

SLA Document - Managed Database Service

SLA ID	SLA-DB-002
Service Name	Managed Database Service
Version	1.5
Customer	Enterprise Customer B
Provider	CloudServices Inc.
Effective Date	2024-01-01
Expiry Date	2024-12-31

Service Levels

Availability

Metric	Value
Monthly Uptime %	99.99
Max Downtime/Month	4.32 minutes
Measurement Window	calendar month
Measurement Method	health check from 3 regions

Query Performance

Metric	Value (ms)
P50 Query Latency	50
P99 Query Latency	500
Query Timeout Threshold	5000
Acceptable Timeout Rate	0.1%

Backup & Recovery

Metric	Value
Backup Frequency	hourly
RTO (Recovery Time Objective)	30 minutes
RPO (Recovery Point Objective)	60 minutes
Backup Success Rate	99.5%

Replication

Metric	Value
Replication Lag	100 ms
Acceptable Lag Breaches/Month	2

Incident Response & Severity Levels

Severity	Description	Initial Response	Resolution Time
CRITICAL	Database completely unavailable or 100% query failure	5 min	60 min
HIGH	Partial unavailability or 10-50% query failure	10 min	120 min
MEDIUM	Query latency SLA breach or 1-10% failure	15 min	240 min
LOW	Replication lag or backup issues	30 min	480 min

SLA Penalties & Service Credits

Uptime Breaches

Uptime %	Service Credit
99.95-99.99% uptime	5% service credit
99.9-99.95% uptime	10% service credit
99.5-99.9% uptime	25% service credit
below_99.5% uptime	50% service credit

RTO Breaches

Recovery Time	Service Credit
recovery_time_60-120_minutes	10% service credit
recovery_time_over_120_minutes	30% service credit

Reporting & Escalation

Frequency: weekly and monthly

Metrics Included: uptime percentage, query latency, backup success rate, replication lag, incident summary

Escalation Contact: database-sla@cloudservices.com

Edge Cases for Testing

1. Replication lag spike at month boundary
2. Backup failure during failover
3. Query timeout during peak hours
4. Cascading failures across replica nodes
5. Recovery time measured across DST transitions

6. Multiple simultaneous node failures
